Justified (an appropriate strategy, taking into account the reasonable alternatives, and based on proportionate evidence)?			✓
Effective (i.e. deliverable over the plan period)?			
Consistent with national policy (National Planning Policy Framework: National Planning Policy Framework (publishing.service.gov.uk))?			✓

Summary of Comments:

Please give details of why you consider the proposed Main Modification that you are commenting on is sound ("Yes") or unsound ("No"), with reference to the tests above. Please be as precise as possible.

The A10 has an abysmal accident record, & is one that I would not want along, despite improvements. The idea of commencing additional building work without enhancing the A10 is absurd & inherently dangerous. This will lead to road deaths! If the A10 was bypassed first, this would be ameliorated immediately.

My other concern is that of drainage. Flooding from excess rain water & drainage is already an issue, & would be exacerbated by building work without drainage being properly considered.

(Continue on a separate sheet if necessary.)

Please note you should cover succinctly all the information, evidence and supporting information necessary to support/justify your comments.
